About Inteliments

- Dutch - Czech company
- Offices in Eindhoven (NL) and Hradec Králové (ČR)
- Young, dynamic and growing company

www.inteliments.com

Who we are

- IoT system integrator delivering complete and innovative solutions
- Team of software architects, developers and business professionals
- Smart Industry technology Ambassadors
- Member of the „*Campione predictive – condition based maintenance*“ fieldlab

What we do

Internet of Things data solutions

- Secure connecting smart things, sensors, devices and other assets
- Data storage and analytics, application design and development, APIs
- IoT data and management platform
- Value / Business propositions

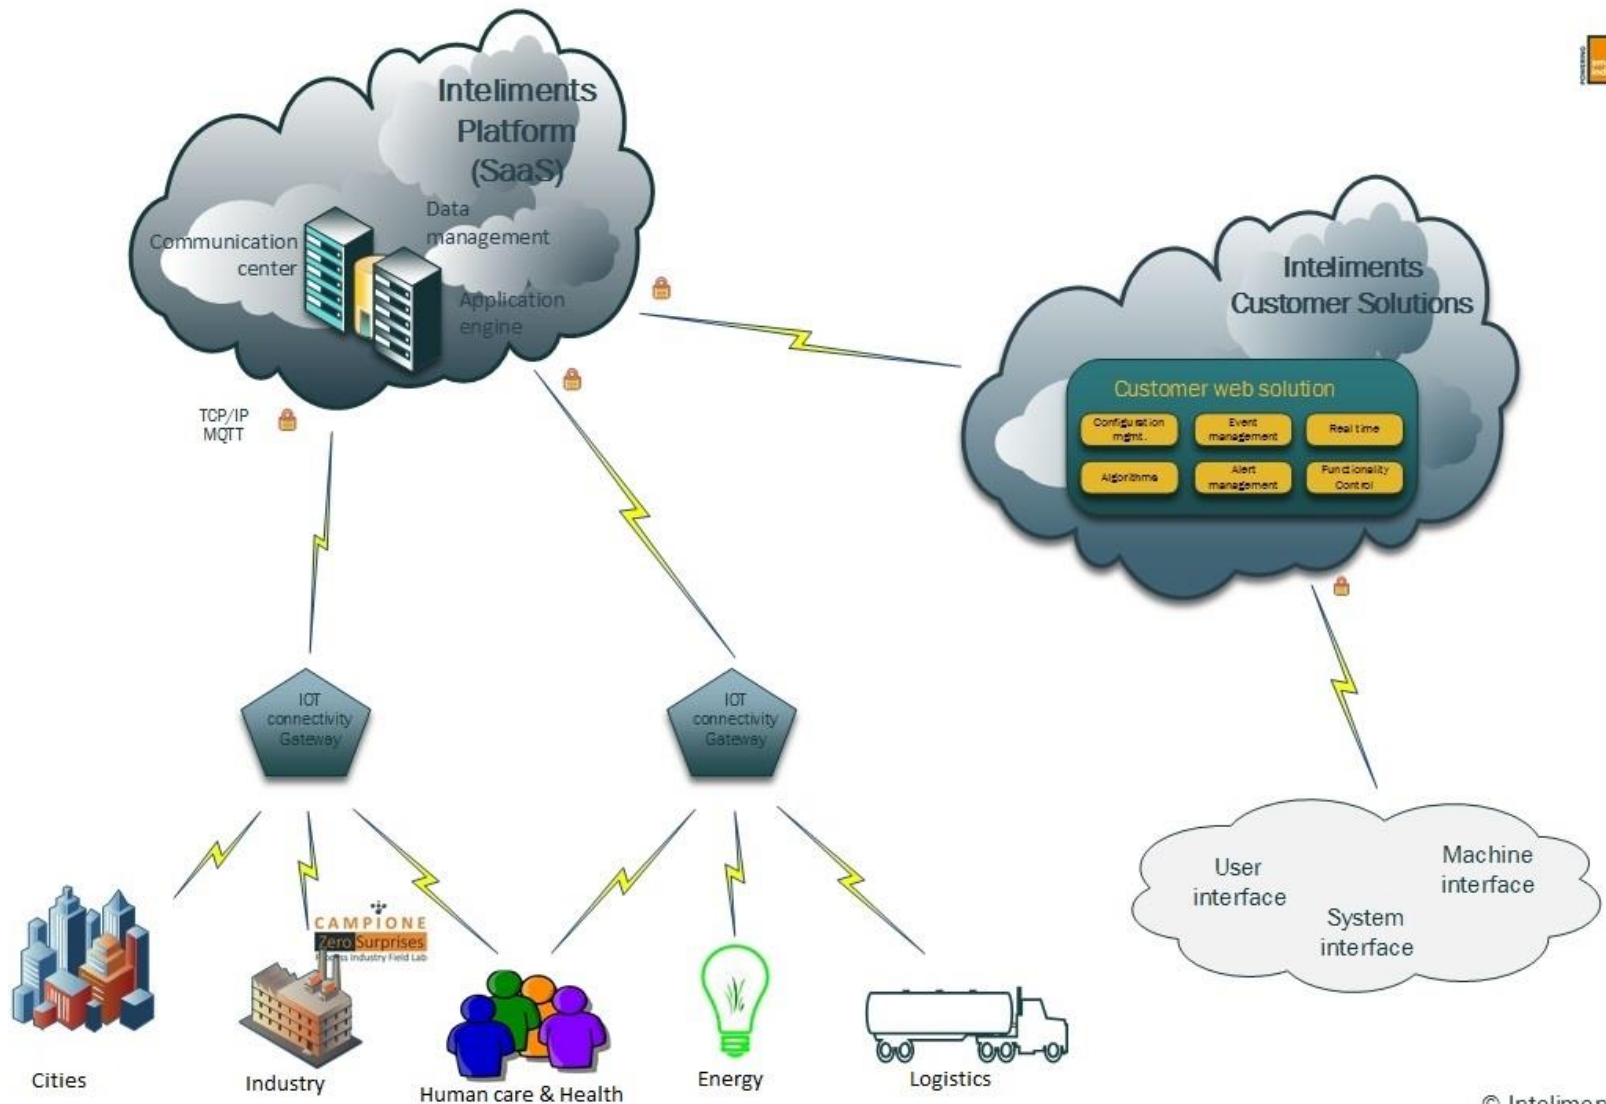

InteliGlue: IoT data and management platform

- Security is our main concern
- Data acquisition (IQRN, MQTT), RF communications
- Storage (resilient distributed database)
- User data API (REST style, MQTT), real time outputs
- Nodes (things, endpoints, clients) management
- Tenants management (multitenancy)
- We can live in cloud or on premises

Use cases

any time series solutions including, but not limited to:

- Environment measurement including room comfort (see AirQuality demo at our booth)
- Mobile devices tracking and data acquisition
- Solar energy measurement (see SolarTherm demo at our booth – ask for demonstration, please)
- Preventive maintenance

Why IntelliGlue

- Universal, cloud or on premises
- Absolutely no supplier lock-in, because:
 - Open standards
 - Open source solutions inside
- High throughput, milion messages per month is no problem
- Friendly and competent team
- Good value for money
- Designed with no single point of failure and with possible geographic distribution

What we can provide to other members

- Acquire, analyze and evaluate data from devices and sensors
- Scalable and resilient IoT data and management platform
- Customer specific solutions

What we are looking for among the members

- New business opportunities
- Partners for sensors technology, electronic device design and manufacturing

... to be able to provide complete IoT solutions on the market together

Thank you Questions? Welcome to our booth
